## EDUCATION

---

### University of Central Florida

*Bachelor of Science in Computer Science*

Orlando, FL

*Expected Graduation Date: May 2026*

## TECHNICAL SKILLS

---

**Languages:** Python, C, JavaScript, HTML/CSS

**Frameworks and Libraries:** Flask, discord.py, pandas, jQuery

**Developer Tools:** Git, Visual Studio, PyCharm, CLion

**Relevant Coursework:** Discrete Mathematics, Matrix and Linear Algebra

## EXPERIENCE

---

### Network Technician

May 2023 – May 2024

*West Networks*

*Gainesville, FL*

- Administered the configuration, deployment, and maintenance of over 100 Peplink EPX routers across international markets, ensuring robust and reliable connectivity for thousands of users in large-scale enterprise networks globally.
- Enhanced customer network speeds by 60% during high traffic hours through implementing access to a multi-cell tower network system via dual-sim protocol.
- Led a team in engineering and designing the portable Peplink Max BR2 Pro to deliver 5G connectivity for both mobile and fixed access applications, driving the project from concept to successful deployment.
- Utilized InControl software to diagnose and resolve network connectivity issues, enhancing service accessibility and optimizing network performance.

## PROJECTS

---

### Stock Price Tracker | *Python, Flask, JavaScript*

- Developed a real-time stock tracking application using Python and Yahoo Finance API.
- Utilized Yahoo Finance API to fetch and display real-time stock prices and historical data.
- Developed data visualizations using Matplotlib to represent stock trends.
- Developed alert system via SMTP to inform users of price fluctuations.

### Discord Sports Bot | *Python, discord.py*

- Developed a Discord bot that integrates with multiple APIs to provide real-time data on live games, scores, and player stats.
- Implemented features to display betting odds, enhancing the experience for users interested in sports wagering.
- Created a fantasy football score tracker, enabling users to monitor league performance and stats easily.
- Added functionality for music playback and video linking, allowing users to queue songs and share media directly within the server for an enhanced community experience.

## LEADERSHIP

---

### Google Developer Student Club

Oct. 2023 – Present

*Marketing Lead*

*University of Central Florida*

- Lead and facilitate weekly club meetings, ensuring effective communication and project alignment among team members.
- Reached out to industry professionals and companies to secure guest speakers for events, enhancing club members' exposure to real-world experiences.
- Collaborated with external organizations to plan and execute workshops and events that provided members with valuable industry insights and practical skills.
- Organized and managed social media to foster community engagement and networking opportunities among club members and external partners.

## INVOLVEMENT

---

- Member - Association for Computing Machinery
- Member - Knight Hack@UCF
- Member - AI@UCF
